

# A NEW & IMPROVED Performance Level

## Sloan's **New and Improved** Wall Hung Closet Series

ST-2400 Series Wall Hung Closets introduce a whole new level of performance and an updated look. The Wall Hung Closet Series is designed to maximize performance with today's lower flushing volumes.

### PERFORMANCE WITH A PURPOSE

Today's extremely low flush volumes leave little margin for error. The ability of a commercial closet to provide peak performance lies in how well the flushometer and closet work together as a system. Sloan has the most experience and knowledge of the critical factors that make these products work well together in all manner of water supply conditions – not just a laboratory. Sloan has applied that knowledge to the new wall hung closet design so you receive the performance you expect from the leader in commercial restroom products.

### Backplate

The newly designed backplate resulted in one of the strongest on the market today. Designed to handle the larger static loads customers expect today but also resists breakage during installation. This means less stress and more peace of mind.

### Water Spot

The size and location of the water spot are critical to helping keep the inside of the bowl clean. With decreasing flush volumes, Sloan engineers designed a bowl that increases the surface area while repositioning it for maximum effect. This keeps the bowl interior out of harm's way which provides a cleaner bowl to start with.

### Design Language

Incorporates design elements that embody a look that is both aesthetic and functional. The design combines convex, compound curvatures that create smooth transitions between surfaces that fit well into a variety of environments and are easier to clean.

---

### Top Spud Features:

- Optimized hydraulics to match Sloan's flushometers
- Increased backplate strength
  - More resistant to breakage during installation
  - Higher static load capability
- Larger water spot relocated to minimize streaking and stains
- 1000 g MaP scores on nearly every one of Sloan's flushometers
- Universal flushing volume can accommodate any flush volume
- ASME 112.19.2-2013/CSA B45.1-13 certified
- Meets ADA and TAS requirements and is cUPC certified

---

### Available Configurations:

Can be purchased together as a combination package with virtually any of Sloan's popular flushometers at any flush volume. They also meet Buy American Act (BAA) requirements when purchased in this way.

Also available as a fixture only in the following Models

- |                      |               |   |
|----------------------|---------------|---|
| • Model: ST-2459     | Code: 2102459 | Top Spud Wall Hung Closet                   |
| • Model: ST-2459-BPL | Code: 2112459 | Top Spud Wall Hung Closet with Bed Pan Lugs |
| • Model: ST-2469     | Code: 2102469 | Rear Spud Wall Hung Closet                  |
