

# PWT

Programmed Water Technologies by Sloan®

The most advanced way to control and conserve water.

# Sloan PWT, a complete solution for managed water systems.

Control is a powerful thing. And when it comes to controlling water, having the most powerful and user-friendly technology makes a world of difference. Because water is powerful, too.

Now, you can take control of every drop with Sloan's new line of Programmed Water Technologies. Our smart, scalable water management products offer tamper-proof hardware, backed by the latest advances in plumbing software. Take control of the water in your facility with the power of Sloan.

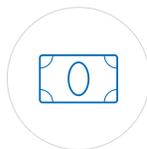

PWT systems are ideal for any new or existing projects including:

- Prisons and correctional facilities
- Behavioral health facilities
- Hospitals
- Educational facilities
- Sport facilities
- Parks and recreation
- Public showers and gyms
- Assisted living facilities

## **Reduce Water Usage**

Visualize and control every ounce of water that flows through your facility.

## **Reduce Cost**

Adjust water usage for every fixture and start saving on water and sewer bills.

## **Reduce Risk**

All our PWT products are designed to prevent vandalism and tampering.

# System Components

Choose from a variety of networkable components that offer different levels of security, control, and scalability. We can work with you to create a system that meets your needs – from control of just toilet activations to a complete solution monitored and managed by the PWT Management Console software.

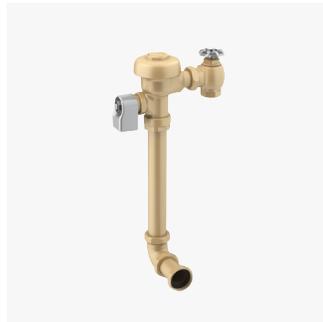

## PWT Software

Control and access every fixture and the data to keep them running smoothly.

### Battery Flushometer

Save on wiring with our battery-operated flushometer for high-security institutions.

### Hardwired Flushometer

Our most tamper-resistant and environmentally-friendly flushometer.

### PWT Controller

The nerve center of our PWT systems is pre-programmed to save water.

### Shower System

Control hot and cold variables and run time for every showerhead.

### Manifold

Mixes incoming hot and cold water supply for showers and sinks.

### Button

Push it to the limit with our rugged, waterproof button hardware.

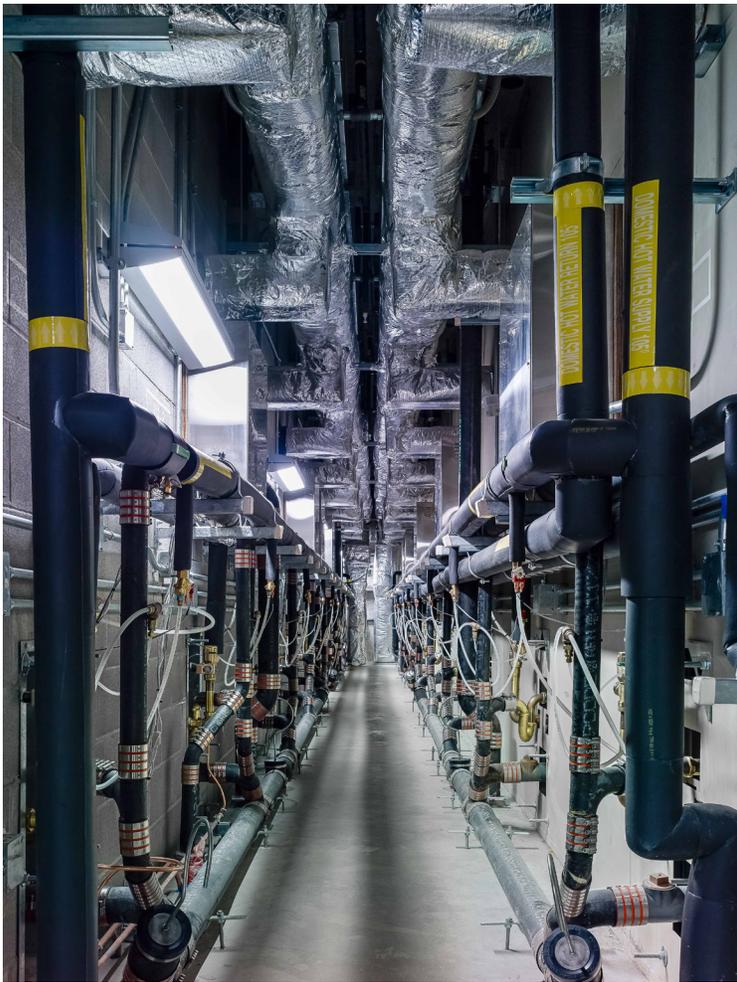

### Solenoid

Engineered for use in lavatory and shower applications.

### Transformer

Connect and operate multiple combinations of fixtures.

## Configurations to match your project

PWT products offer a modular, flexible system in the most inflexible environments. They are designed to be independent of other building automation systems to easily integrate and configure into both new and existing projects.

### Toilet System Control

Save maintenance time and cut costs with toilet units that help prevent unwanted tampering.

#### PWT products

- Flushometer
- Button

### Shower System Control

Regulate water pressure, temperature, and shower length across every showerhead in your system.

#### PWT products

- PWT controller
- Manifold
- Button
- Transformer
- Showerhead
- PWT software

### Complete Restroom Control

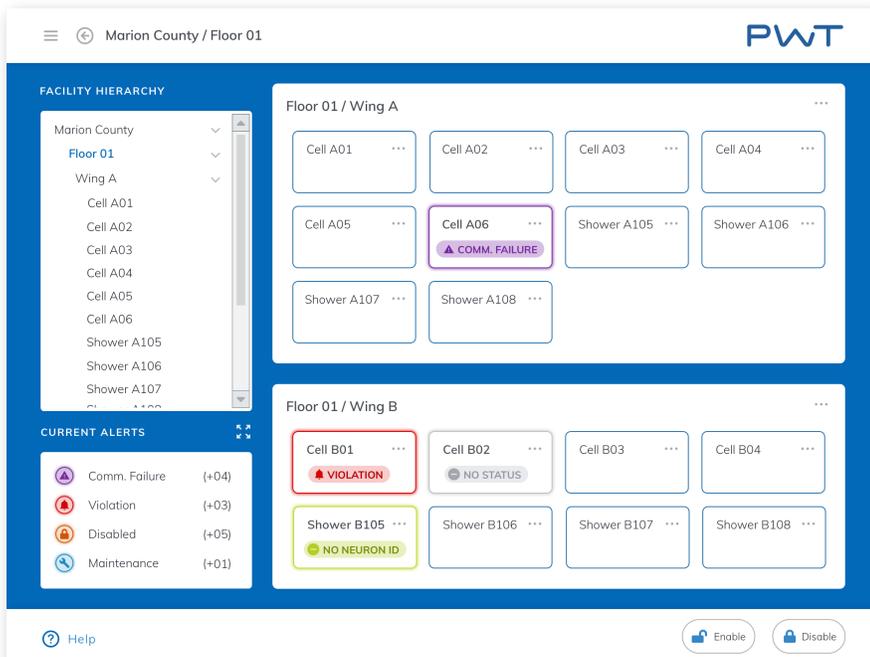

Manage every aspect of your restroom water system, and keep unwanted tampering at bay.

#### PWT products

- Flushometer
- PWT controller
- Manifold
- Button
- Transformer
- Solenoid
- Showerhead
- PWT software

# Control the flow like never before

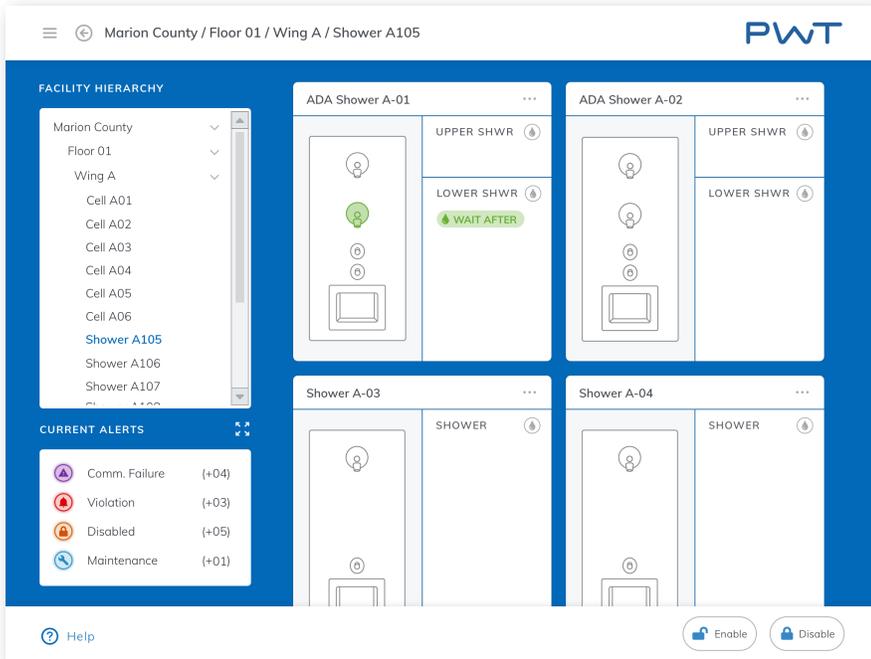

The user-friendly management console interface gives you access to the status and usage patterns of the fixtures in its network, and the data to keep them running.

## Manage your facility

Review water usage data and product status in real-time from our easy-to-use interface. Our management software puts you in control of a wide array of variables.

- Length of shower time
- Number of toilet activations
- Hourly limits on flushometer activations

## Track system alerts

Use our management software to review system alerts in real time to prevent vandalism and misuse. And if issues arise that require shutting off the water, our interface allows for localized valve closures at the touch of a button.

- Address system alerts faster
- Control the run time
- View report history per device

## View and create reports

Get smart about your water usage with all the details you need to refine how your facility interacts with your fixtures. Our water management software offers granular data to track usage over time so you have the insights required to adjust settings as needed.

- Generate comprehensive water usage reports
- Modify reports to see usage by location, fixture type, or time frame
- Get ahead of long-term usage issues before they become expensive
